

4  
book a  
class

# problems

## CADETS

Cadets need tiggers for their projects

## SUBJECTS

So many subjects that we should understand to do one project

## PEDAGOGY

This method still can be explored by other methods

# what we need?

## CADETS

something that trigger cadets push their limits.

## SUBJECTS

clear guidance doing the projects.

## PEDAGOGY

more medium to explore this method.

# 42 book a class

This is an app that helps **cadets**  
doing their part as a **teacher**  
or as a **student**

October :

As a teacher (1/2)

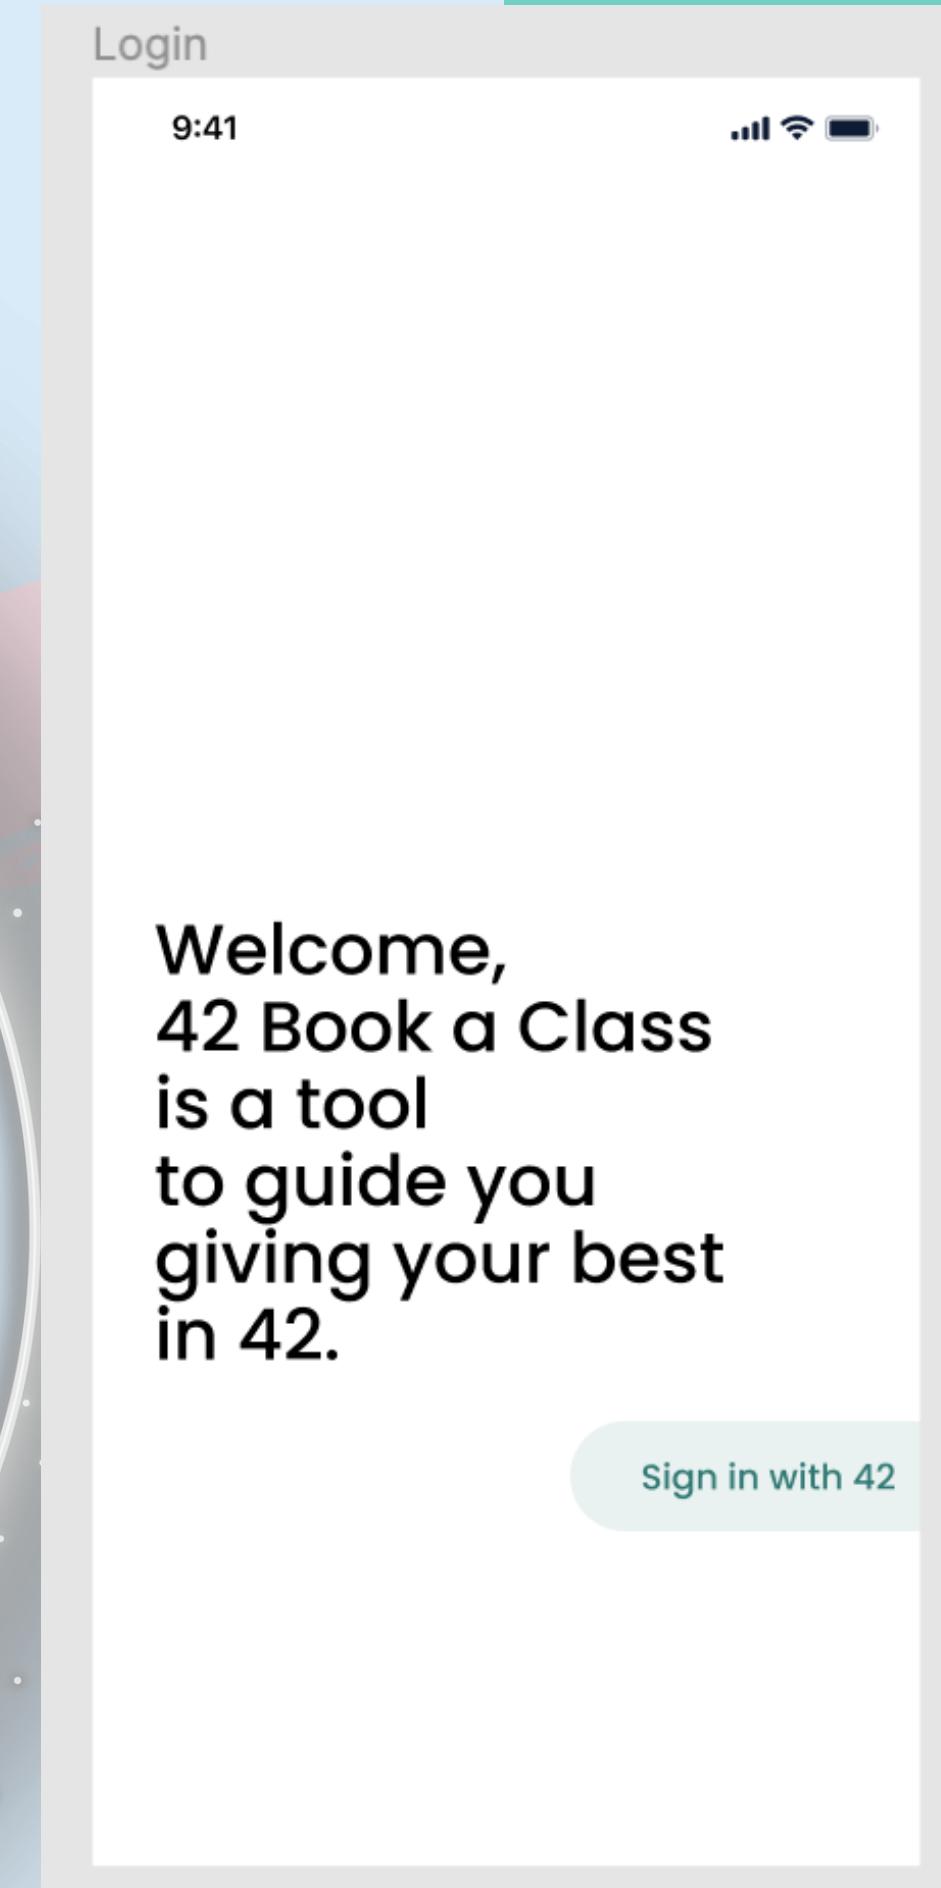

As a student (2/2)

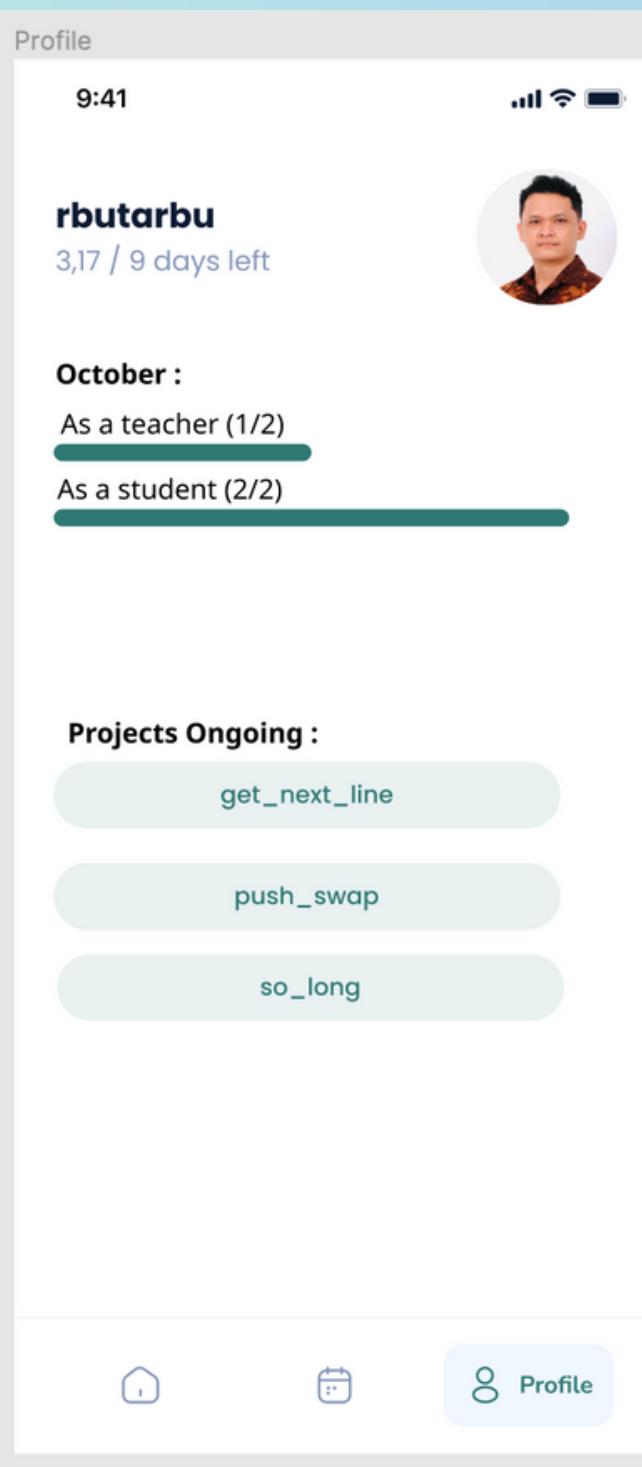

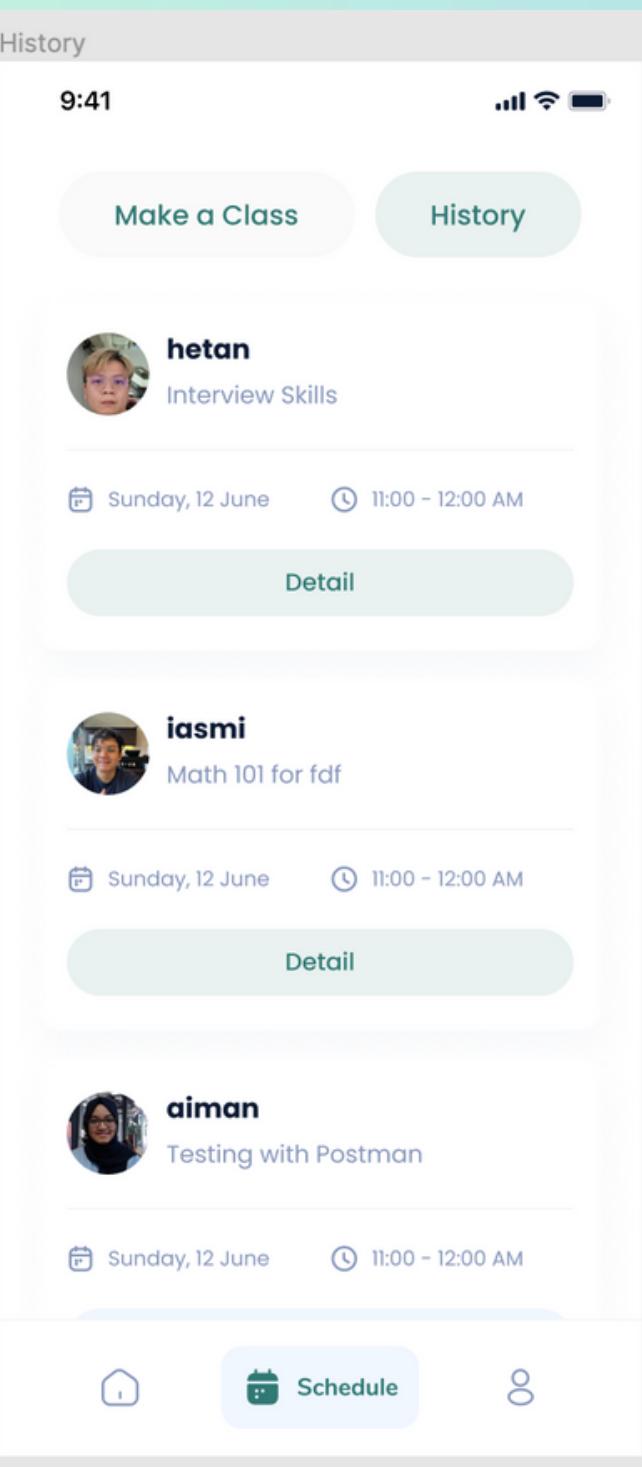

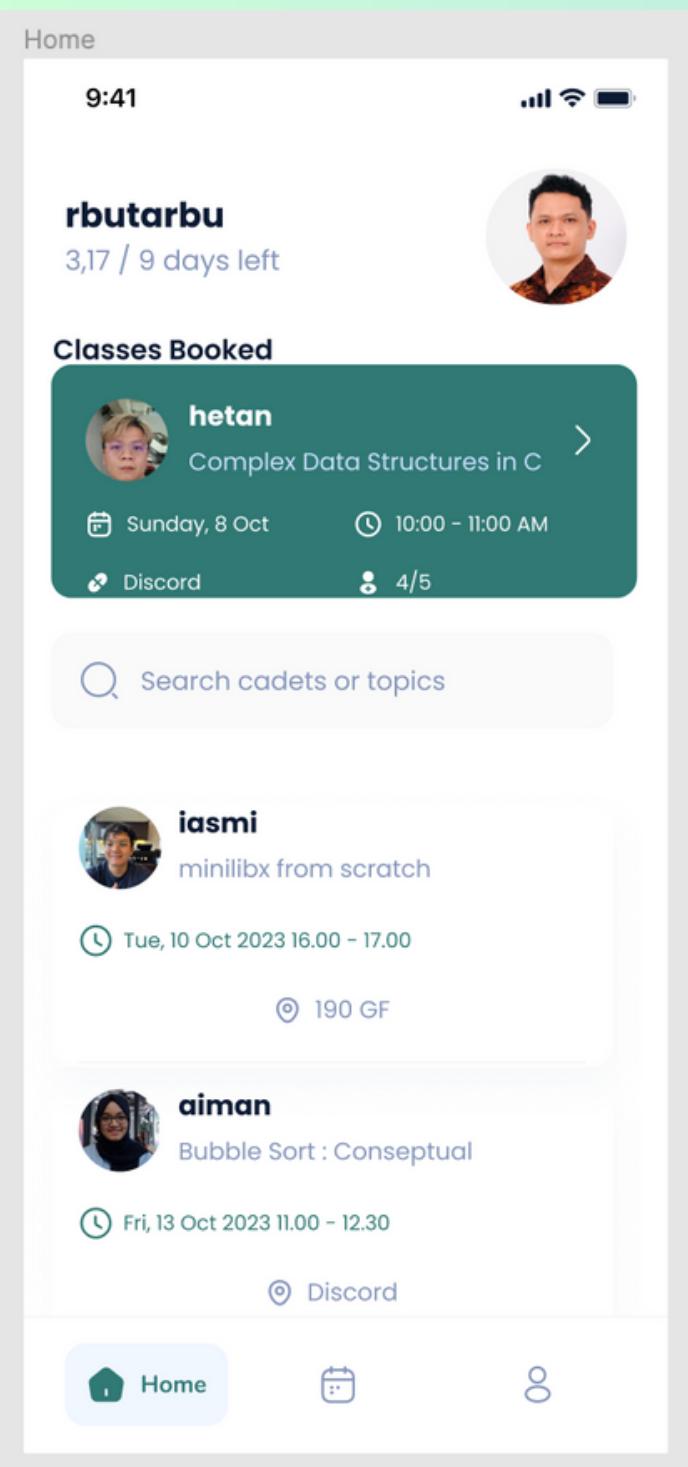

Projects Ongoing :

get\_next\_line

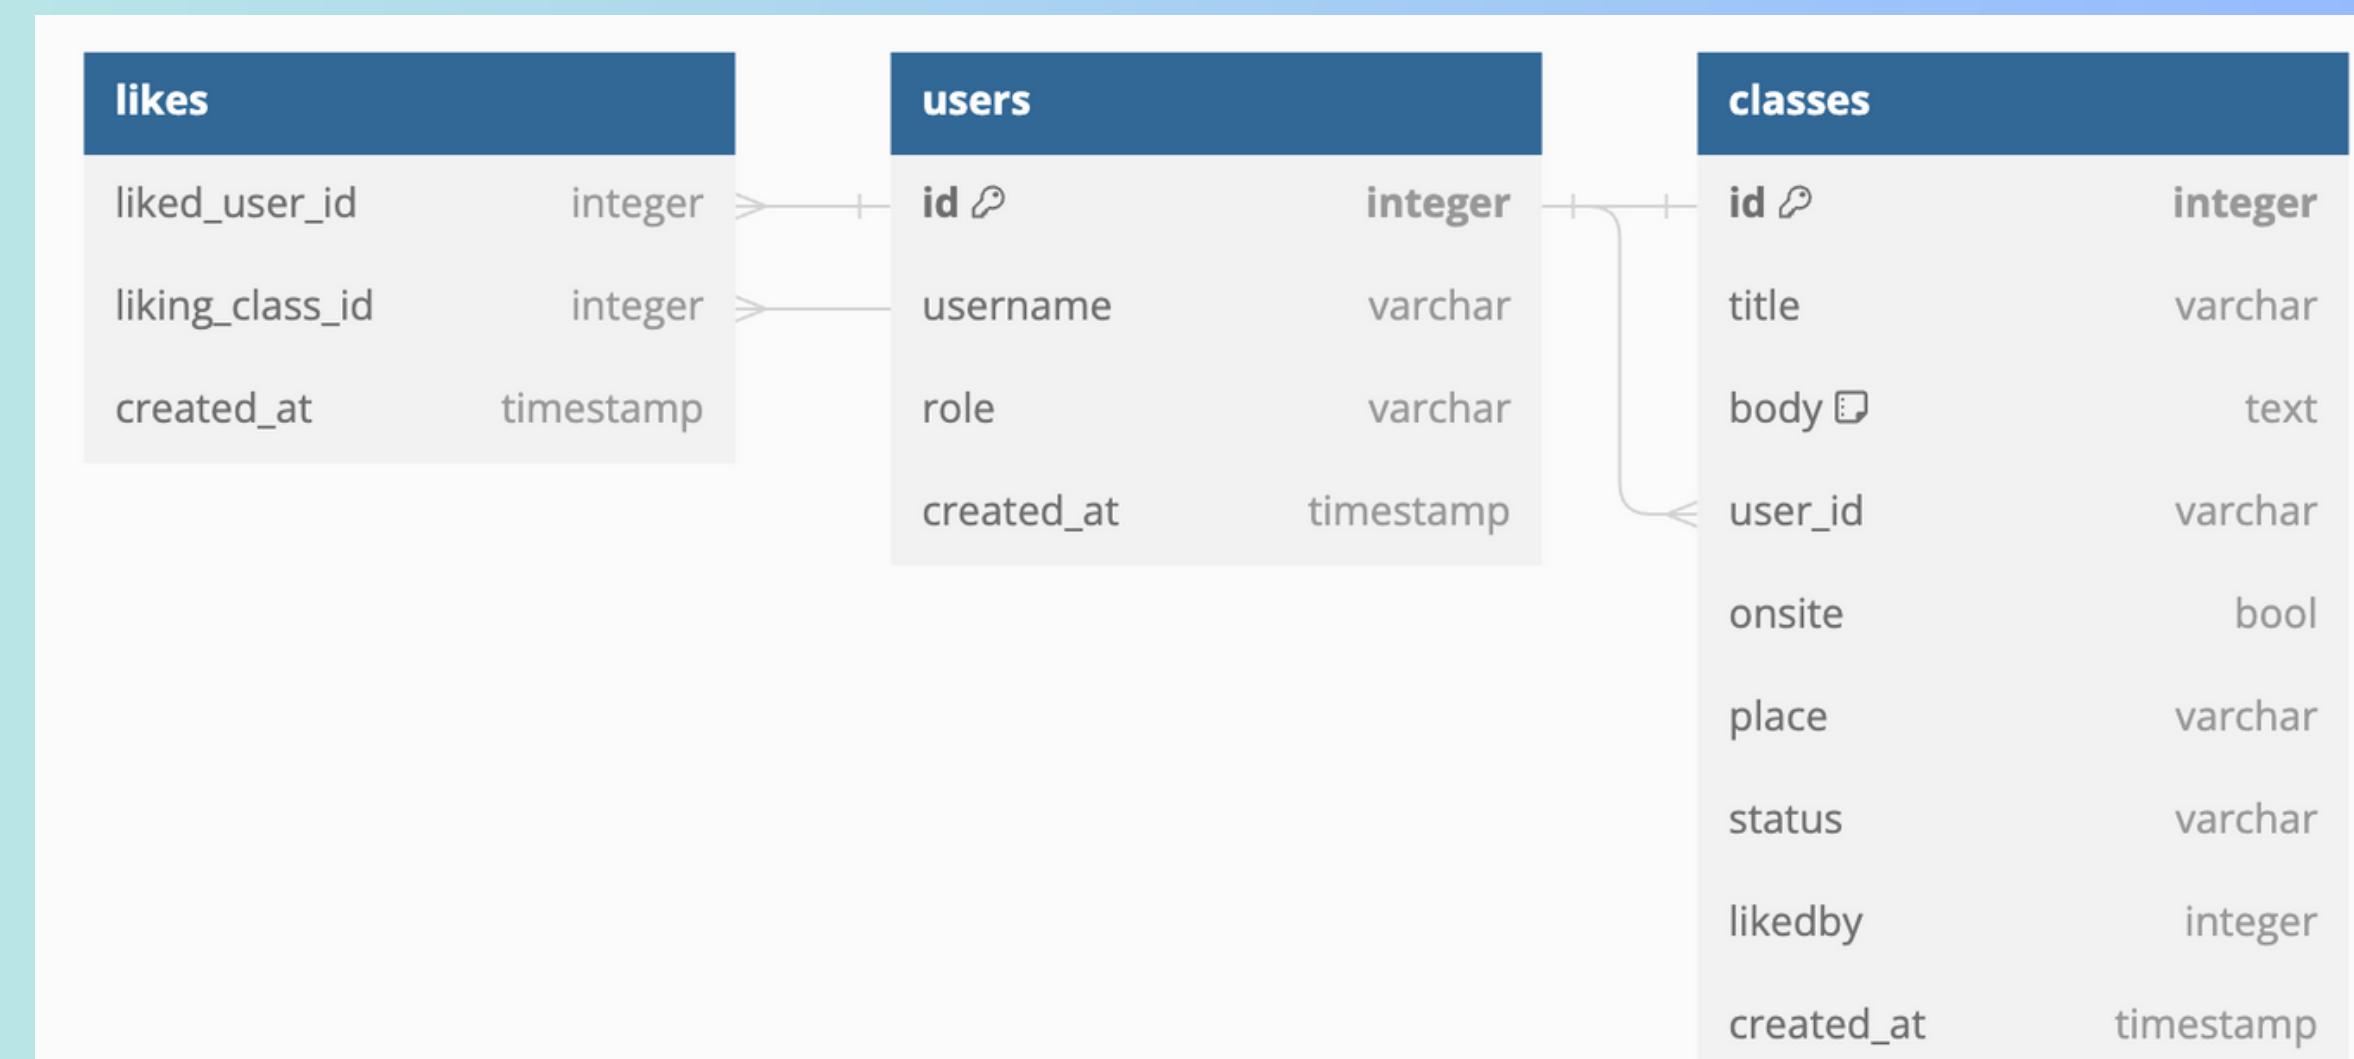

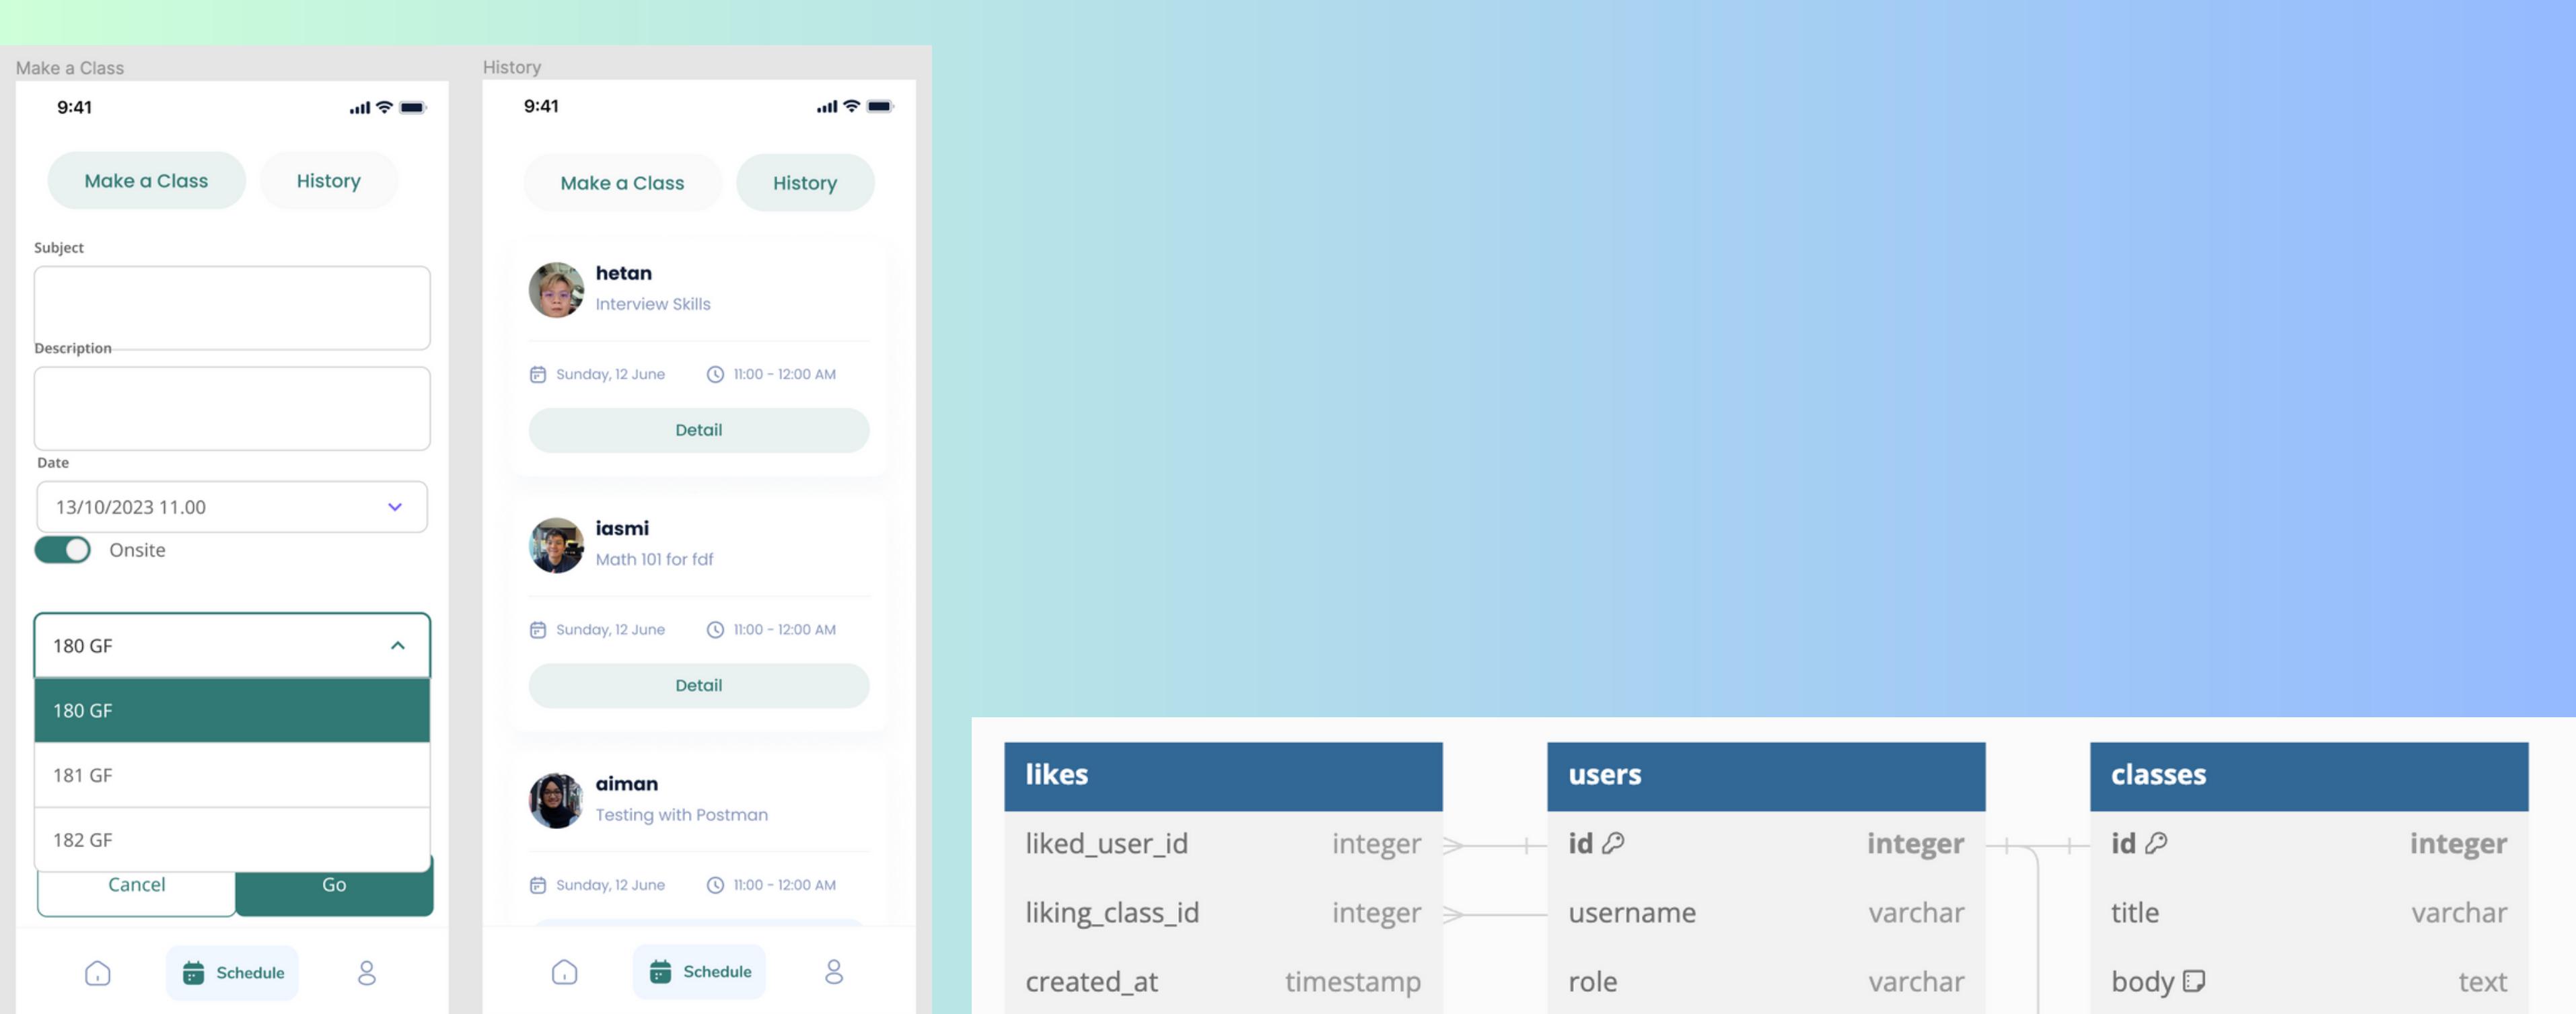

- Front-end with flutter so we can deploy on several platforms.
- Back-end with node-js.
- RDBMS using sqflite.

It's a clever protocol that lets external apps request permission to your private 42 account details through tokens, which can be customized to specific data types and revoked by you anytime. So, no more fretting over password sharing - OAuth2's got you covered!
